

Embedding YouTube into Canvas

In this direction sheet you will learn the best practice to embed a YouTube video in Canvas. This will allow Canvas to play the video at ideal size and not link out to YouTube.

1. Click +Add Page within your Canvas module

Add Item to Testing Module

Add Page to Testing Module

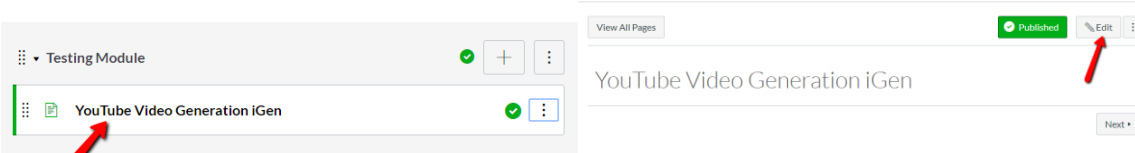

Select the page you want to associate with this module, or add a new page by selecting "New Page".

- [New Page]
- Accessibility Statement
- Adding a Prerequisite
- antibiotics video review
- Changing the Content Name
- chapter 33
- Check your grades
- Communicate with your instructor and peers
- Contribute, View, & Submit

Page Name:

Indentation: Don't Indent

2. Return to your newly created page and click edit

Testing Module

- YouTube Video Generation iGen

View All Pages Published

YouTube Video Generation iGen

Next

3. Within the Page Edit function, click on HTML editor to turn on Rich Context Editor

The screenshot shows a page editor interface. At the top, there is a text input field containing "YouTube Video Generation iGen". Below this is a rich text editor toolbar with various icons for bold, italic, underline, text color, background color, link, unlink, image, and other formatting options. The current paragraph is selected, and the text "Paragraph" is visible. A red arrow points to the "HTML Editor" button, which is located to the right of the toolbar. Below the editor, there are options for editing permissions, including a dropdown menu set to "Only teachers" and a checkbox for "Add to student to-do". At the bottom, there is a checkbox for "Notify users that this content has changed" and two buttons: "Cancel" and "Save".

4. You should now see this page

The screenshot shows the same page editor interface as in the previous step. The text input field still contains "YouTube Video Generation iGen". The "HTML Editor" button is now replaced by the "Rich Content Editor" button, which is highlighted with a red rectangular box. The rest of the interface, including the toolbar, options, and bottom buttons, remains the same.

5. Retrieve your YouTube Video Embed Code.

- A) Click Share B) Click Embed C) Copy embed code
